Report of Superintendent of Schools

To the School Board of the Town of Danbury:

I submit, herewith, my second report as superintendent of schools.

The tables for the roll of honor and the statistical table cover the year ending June 30, 1930. The financial report also covers the same period.

May I refer you to the table of statistics and call your attention to the figures for the half days which the schools were in attendance? This is somewhat less than for the previous year, and lower than the average for the State. The length of the school year is 36 weeks or a to-

tal of 360 sessions. At least an effort should be made to equal the average of the State which at the present time is 354 sessions.

1930-31

The year opened in September following Labor Day with the same corps of teachers and practically the same enrollment. There is a larger eighth grade than last year and should the entire grade go on to high school there will be a slight increase in high school attendance. The estimate for high school tuition is given in the budget as \$200.00.

The amount of money raised at the last school meeting to meet the cost of high school tuition was \$1700.00. The actual cost this year is \$1964.48. Transportation for the current year is somewhat in excess of what was anticipated when the money was raised at the last district meeting. At that time \$630.00 was raised, \$724.00 is being paid this year, \$350.00 ought to be raised at the coming meeting and be made immediately available to meet this increased cost.
